

## Module-4: Auto-Scaling Assignment

---

### Problem Statement:

You work for XYZ Corporation that uses on premise solutions and a limited number of systems. With the increase in requests in their application, the load also increases. So, to handle the load the corporation had to buy more systems almost on a regular basis. Realizing the need to cut down the expenses on systems, they decided to move their infrastructure to AWS.

### You have been asked to:

1. Create a Web Server AMI with Apache 2 server running in it
2. Create a Launch Configuration with this AMI 3. Use this Launch Configuration to create an Auto Scaling group with 1 minimum and 3 maximum instances
