Module-3: IAM Users Assignment 1

Problem Statement:

You work for XYZ Corporation, to maintain the security of the AWS Account and the resources you have been asked to implement a solution that can help easily recognize and monitor the different users.

You have been asked to:

1. Create a 4 IAM users name "Dev1", "Dev2", "Test1", and "Test2".
2. Create 2 Groups named "Dev Team" and "Ops Team".
3. Add Dev1 and Dev2 to the Dev Team.
4. Add Dev1, Test1 and Test2 to the Ops Team.
