Module-4: Route53 Assignment

Problem Statement:

You work for XYZ Corporation that uses on premise solutions and a limited number of systems. With the increase in requests in their application, the load also increases. So, to handle the load the corporation had to buy more systems almost on a regular basis. Realizing the need to cut down the expenses on systems, they decided to move their infrastructure to AWS.

You have been asked to:

1. Use the Route 53 Hosted Zone created in the Assignment
2. Route the traffic to an EC2 instance with an Apache web server running in it using it's IP address
