Module 11: Migration
Assignment - 1

Problem Statement:

You work for XYZ Corporation. Your corporation wants to move their infrastructure to the cloud to improve the performance and availability of the application hosted. You are given the opportunity to accomplish the tasks for successful migration.

Tasks To Be Performed:

1. Create an Ubuntu server VM on your local machine by using Oracle VirtualBox.

   Oracle VirtualBox - https://www.virtualbox.org/wiki/Downloads

   Ubuntu Server ISO -
   https://releases.ubuntu.com/18.04.5/ubuntu-18.04.5-live-server-amd64.iso
